

BEYOND
SOFTWARE™

ContinuED® Software for Continuing Education Centres

ContinuED is a user-friendly web-based software solution that revolutionizes the way Continuing Education Centres operate. By providing an efficient and comprehensive set of tools for users and administrators, ContinuED can manage and track credit and non-credit programs for summer school, night school, ESL courses and more.

ContinuED® takes you beyond the software by:

Giving you real-time information

ContinuED eliminates virtually all of the traditional challenges associated with the organization of continuing education by accurately tracking collected fees and preventing duplicate registrations. Real-time information on courses, locations, and enrollment is readily available, making opening day line-ups a thing of the past.

Streamlining communications

ContinuED gives students and adult learners access to up-to-the-minute information on programs and school details, including waiting lists and course changes. Users can download prerequisite readings, print receipts for fees paid, produce location maps for program delivery sites, and even check on parking availability.

Producing significant savings for your organization

By having a one-stop online resource for clerical staff and administrators, ContinuED cuts costs by reducing staff time spent on tracking registrations, issuing confirmations and balancing financial transactions. Paper and printing costs also fall drastically as class confirmations and registrations are no longer managed manually.

Integrating with Student Information Systems

ContinuED imports and exports data to student information systems. Multiple reports relating to enrollments, target groups served, grades achieved, and other important demographic information can easily be generated. Trends and patterns are identifiable, updates can be implemented, and resource planning is improved.
