

PD Place™ Professional Development Software

When implementing new software for your organization, there are many factors and steps involved.

Below are some of the frequently asked questions CoreSolutions has encountered about PD Place. If your question isn't included, contact us at 1.800.650.8882 or sales@coresolutions.ca and book your free software demonstration to learn more about PD Place.

What databases are supported by PD Place?

PD Place currently supports MySQL 5.X or Microsoft SQL Server 2000/2005/2008. MySQL is the recommended database for optimal PD Place performance.

How can we tailor PD Place to suit our needs?

PD Place provides more than 300 preferences that can be used to customize the application to reflect your requirements. Unique preferences can be set for in-services, users, calendars, resources and surveys.

Does PD Place interface with online payment services?

PD Place software interfaces with MiraPay, Moneris and PayPal. Once your merchant account is established, we simply configure the software to your payment system.

Can we export information from our HR database to PD Place?

Yes, staff details can be extracted from your HR database. You can directly populate PD Place import tables or you can create a CSV file (Comma Separated Values) and import it into PD Place. This feature ensures accurate and consistent staff data across all of your systems.

Our staff uses Microsoft Outlook calendar. Can events in PD Place transfer to their individual Outlook calendars?

PD Place provides an icon next to each staff member's online registrations and next to each event listing. Clicking the icon will allow the user to download details of the event to Outlook or any other iCal-enabled program.
