

PD Place™ Professional Development Software

To ensure PD Place's optimal performance, below is a list of technical specifications to maximize your software solution.

Hardware

- Pentium 4 2.8 Ghz or better recommended (Dual Xeon – best choice)
- Hard Drive – minimum space 200 MB (SCSI 10k-15k drive offers best performance)
- 1-3 GB RAM – if running the database on the same machine then 2 GB is the recommended minimum
- 1 Gigabit NIC connection recommended, especially if using a remote database server

Software

- Windows 2000/2003/2008, Linux, UNIX and any other platform supporting PHP 5.2.x
- Apache 2.0/2.2
- IIS 5.0/5.1/6.0/7.0 can also be used for Windows server installations
- Aspell Spell Checker (latest available version)
- MYSQL 5.x or SQL Server 2000/2005

Quick Size Calculator

Based on each 150 concurrent connections anticipated, you will need:

- 1 GB RAM
- 1 Processor (2.8 Ghz)

Note: If running the database server on the same machine, add 1 GB RAM more and faster CPU if possible

Client/Workstation (End User Minimum Requirements)

- Windows – ME/2000/XP/Vista/7
- Pentium Celeron or better
- 256 MB RAM or better
- Internet Explorer 5.1/6/7/8, Mozilla Firefox (Any CSS2 compliant browser)
- MacOS – OS9 or better
- Safari or Mozilla Firefox Browser (IE 5.2 on Mac handles most features, but not all)
